

➊ Square candle machine

Model Square MR (24, 42 and 60)

Machine to manufacture square candles, with an output cycle every 30 minutes.

Production of 24, 42 and 60 units, according to the number of moulds in each model.

Technical Specification:

- 1- Box: makes the candle model in accordance with the diameter and the length
- 2- Extractor with tips and support table: model of the candle tip and the extractor support
- 3- Crank: lifts the table to pick up the candles
- 4- Needle: intended to punch the candle, for wick placement
- 5- Needle supporting grid: where the needles are supported
- 6- Box supporting basis: supporting basis of the thread to lift the extractor table
- 7- Height adjuster: adjusts the candle height
- 8- Lever: lifts the needle grid
